

INNOVATIONS IN PROSTHETICS FOR YOUNG PEOPLE

Me and my limb

Collecting your experience of
living with a prosthetic

Young adult survey

About starworks

We are a young peoples prosthetics research collaboration and will bring children and their families together with key opinion leaders from the NHS, Industry, Clinical Academia and leading National Research Centres with capabilities in child prosthetics.

The collaboration will increase research across the system in order to accelerate the translation of new inventions and developments in child prosthetics into everyday use. This initiative will be centred on the needs of children and their families as well as the NHS and will ensure there is the ideal balance of 'clinical pull' and 'technical push' to create an energetic environment in which to innovate and to partner with industry.

This workbook

We would like to find out about your experiences of your child's prosthetic limb. There are a series of questions to complete, use the spaces provided for your responses. Please give as much detail as you feel able to. We encourage you to answer all the questions if possible, but if you choose not to answer any that's ok.

About you

★ Your name

★ Affected limb

★ Contact information (if you are happy to be contacted further)

Your limb

Draw a picture or tell us a bit about your limb below. Do you have a name for it?

My Story

How did you get your limb? Have you had it since birth? Can you remember how many different ones you've had? Tell us your story or draw a time line

Are there any
high or low points
on your journey
you would like to
tell us about?

Because i have a limb i can

These are the things i like most about my limb

These are the hardest things about having a limb

Daily life

Tell us about your average day. Try and think about what happens from first thing in the morning to going to bed at night.

Are there any
tricky points with
your limb during
the day, show us
where and tell us
about them

A visit to...

Use the space below to describe what happens when you visit the hospital, GP, limb centre or other professional interaction in connection with your limb.

What do you like
the most about
these
interactions/
visits?

What do you
dislike about
these interactions
/ visits? Tell us
about it.

**Thank you for taking part you
