

Are you over 60 and drive?

... or do you care for someone
who is over 60 and drives?

Devices for Dignity is based within the NHS, and develop innovative medical devices, healthcare technologies and technology-dependent interventions. We would like to invite carers to have your say about options for the assessment of driver safety for people aged 60 and over.

Could you spare time (in the first week of February) to talk with us about your views? We can offer a **£10 thank you voucher** as a gesture of thanks for your time.
